

Slip Top Base Assembly

PELCO SOLUTIONS
FAMILY OF BRANDS

▶▶▶ Pelco's NEW Slip Top Base Assembly...

With Non-threaded Pole Options

We've made it easy! Pelco has integrated the slip top base, door, pole cap, and pole configurations for streamlined ordering. Every component option works together under a single part number. Plus, non-threaded poles simplify installation.

PB-5239 Slip Top Base Assembly

Multiple Non-Threaded Pole Options

1

Multiple pole configurations available

2

Dual locking mechanism for security

3

Integrated package simplifies ordering

4

Better roadway alignment with Slip Top design

5

Increased longevity versus a threaded connection

6

Easier & faster installation/maintenance with non-threaded connection

7

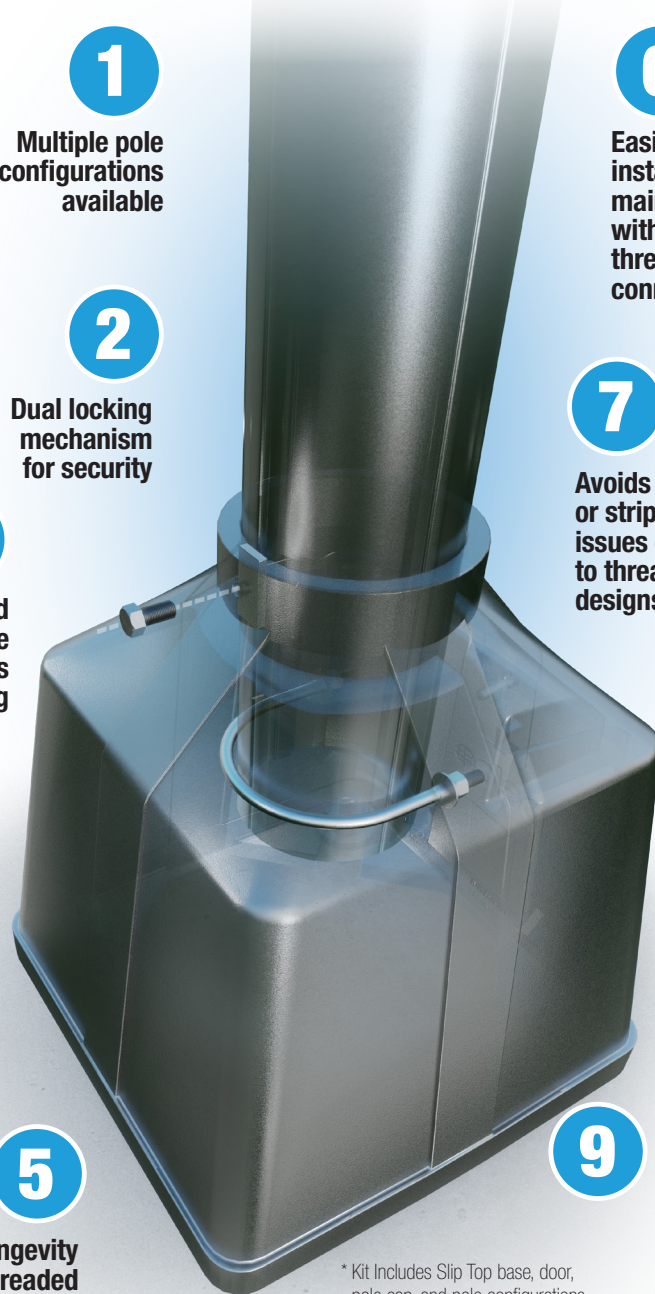

Avoids seizing or stripping issues common to threaded designs

8

Capable of supporting all standard configurations and mounting applications

9

Maintains strength throughout life of the product

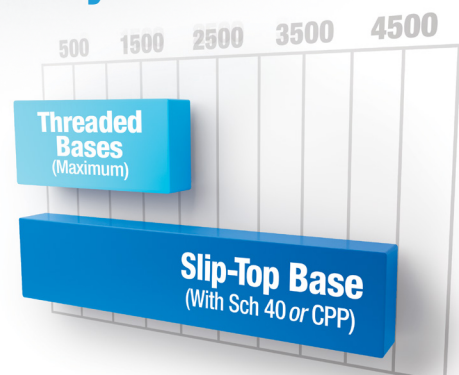

* Kit Includes Slip Top base, door, pole cap, and pole configurations

Outperforms Threaded Bases. Proven to Last.

Pelco's Slip Top Base delivers the same strength as a 12K base with proven resistance to fatigue and loosening—outperforming traditional threaded bases by more than **2X** in independent vibration testing. **Maintains Strength in High Vibration Locations.**

Pelco's Slip Top Base lasts up to 4500 Cycles without failure. Threaded Bases typically fail around 2000 Cycles.

Cycles Until Failure

PB-5239

Slip Top Base Assembly

Easy Customizable Options in a Fully Integrated Assembly

Key Features:

- Complete assembly under one part number
- Slip Top base, door, pole cap, and pole ordered together for simplified procurement
- Easier & faster installation/maintenance w/ non-threaded poles
- Connection not a point of failure – stronger than threaded base/pole connection
- Standard pipe or custom profile pole
- Consistent fit & finish
- Components designed to work together as a system
- Flexible for different applications
- Configurations cover the majority of common field use

Increased Versatility & Strength...

SOLUTIONS

Custom Profile Pole

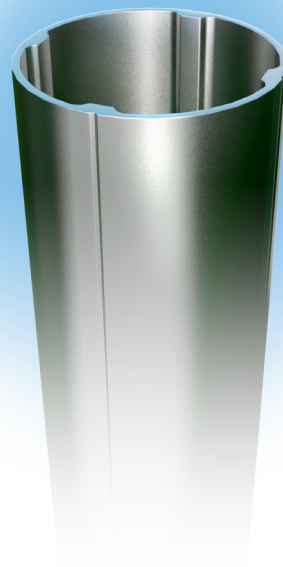

Key Features:

- Custom profile pole design engineered for Slip Top Base
- Strength comparable to a threaded Schedule 40 pole
- Lighter-weight construction compared to traditional pole

Benefits

- Lower shipping costs due to reduced weight and more efficient transport
- Easier handling and installation in the field thanks to lighter components
- External indicator for bolt through mounting every 90 degrees

Assembly Includes:
Standard Pipe or Custom Profile Pole Options – One Number
